

## Information for Everyone – from Government Data Sources

**Date 6th August 2022**

The **Excess Death Data** are showing worrying signs, month by month. The Australian Bureau of Statistics (ABS) recently released the latest update for Provisional Mortality. Here are the Statistics from the ABS website –

### ***Key statistics***

- *In 2022, there were 59,147 deaths that occurred by 30 April and were registered by 30 June, which is 8,513 (16.8%) more than the historical average.*

*Throughout this report, counts of deaths are compared to an average number of deaths for previous years. In this report, data for 2021 is compared to an average number of deaths recorded over the 5 years from 2015-2019 as was the case in previous publications. Data for 2022 is compared to a baseline comprising the years 2017-2019 and 2021. 2020 is not included in the baseline for 2022 data because it included periods where numbers of deaths were significantly lower than expected.*

<https://www.abs.gov.au/statistics/health/causes-death/provisional-mortality-statistics/jan-apr-2022>

The year 2020 was the year that the Covid “pandemic” and the associated panic was at full tilt. This was presented as a deadly pandemic worthy of serious government actions such as States of Emergency. But the ABS tells us that the death numbers were “lower than expected” during that year. So where was this deadly threat?

### **The Year 2022 in Australia –**

Excess deaths for the 4 months up to the end of April 2022 (mostly summer months and before the onset of winter) are at **16.8% above** the baseline average.

This is a shocking statistic. There should be no excess deaths in summer. Epidemiology studies conducted in many nations over many decades show excess death spikes as always occurring in winter months.

## EXCESS DEATHS CONTINUE IN AUSTRALIA, UK, EUROPE AND UNITED STATES — NOT COVID

On Friday 29th July 2022, the Australian Bureau of Statistics released their latest Provisional Mortality Statistics Report for Deaths from All Causes. It showed that to the end of April, there have been almost 60,000 deaths in total this year which is 8,500 more than expected. This is **16.8 %** above the historical average.

Deaths due to dementia including Alzheimer's disease were **20.7%** above the baseline average in April, and **20.4%** above the baseline average for the year to April.

Deaths due to Cancer were **4.7%** above the baseline average in April and **5.7%** above the baseline average for the year to April.

Deaths due to Diabetes remained **10.3%** above average in April and were **18.9%** higher than the baseline average for the year to April.

Cancer, Dementia and Diabetes. What can possibly explain these increases?

Let's look at Covid as a possible causative factor. In the month of April, there were 654 deaths attributed to Covid-19 out of a total of 14,492 deaths. **Thus, Covid attributed deaths were only 4.5 % of the total.** From generally accepted US and Israeli data, Deaths from Covid are generally regarded as just 6 % of the Deaths attributed to Covid (having a positive test result for Covid at time of death). In other words, 94 % of those deaths attributed to Covid were actually caused by something other than Covid. Thus, using that fact as a base for analysis, Australia may have suffered only 40 deaths from Covid in the month of April. And 40 deaths represents just 0.27 % of the total deaths of 14,492.

This extremely low number reflects what would be expected from the Omicron variant of Covid. Viral mutation registrations worldwide are now 100 % Omicron variant, known for its increased aggressive transmissibility (spread) but much lower mortality compared to the previous Alpha and Delta variants.

The other consideration here is that these first 4 months of the year are summer months in Australia. Summer months should not generate any excess deaths in any nation. Epidemiological evidence from many nations over many years shows that excess deaths above annual expected averages are always a Winter event with Influenza and other respiratory viruses presumably being the cause, leading to increased death in the elderly, frail and chronically ill.

This then begs the question — what are the excess deaths being caused by in Australia's summer months of 2022?

It is possible that delayed diagnosis and treatment may be to blame, or perhaps suicide but there is no substantial evidence for either as a complete explanation. The other possible cause is Covid Vaccine injuries.

The foreign Spike Protein created by the man made genetic material in the Covid injections has been known to be pathogenic (disease causing) for at least a year now. This was established by lab work done by the prestigious Salk Institute in San Diego and published in April 2021. That work showed damage to the endothelial layer from the Spike Protein alone (the Virus was not present). The endothelial layer is a critical, single layer of cells in all blood vessels. *"A lot of people think of it (Covid 19) as a respiratory disease, but it's really a vascular disease,"* said Assistant Research Professor Uri Manor, who was co-senior author of the study.

Reference: [The novel coronavirus' spike protein plays additional key role in illness - Salk Institute for Biological Studies](#)

There are also strong suspicions that the blood brain barrier may be possibly breached by the Spike Protein molecules produced by the vaccines. If so, that could possibly lead to enhancement of pre-existing neurodegenerative brain diseases such as Dementia/Alzheimer's Disease and Parkinson's Disease.

The Spike Proteins are also designed to attach to ACE2 Receptors in the body which are more prevalent in Diabetics. And there is laboratory work that shows Spike Protein penetration of the nucleus of cells leads to inhibition of the DNA repair mechanisms present there. Other lab work has shown penetration of the cellular nucleus by the man-made mRNA genetic material. This genetic material has also been shown to undergo reverse transcription into the DNA within 6 hours of exposure to human liver cells.

So — theoretically, all of these aspects established in laboratory studies (in vitro) could occur in the human body (in vivo). If so, the result could theoretically be a range of vascular diseases from endothelial damage, increased neurodegenerative diseases, worsening diabetic control and the possible re-activation of pre-existing, latent viral diseases (such as Chickenpox Virus/Shingles/Herpes Virus) and pre-existing cancers.

All of this theoretical risk is deeply concerning to many Doctors and scientists around the world. Thousands of them have signed Declarations of concern regarding the use of this new genetic therapy technology in the human clinical trials that governments like to promote as "safe and effective" and call "Vaccination Programs".

The Great Barrington Declaration now has almost a Million signatures attached from experts. The Global Covid Summit Declaration has 17,000 signatures. And the Global Covid Summit Pediatric Declaration regarding childhood risk from the Covid vaccines was issued by Concerned Physicians and Medical Scientists last month on June 6th 2022. The Global Covid Summit group of doctors and medical scientists have now established a Decentralized Medical Network stating

*We the physicians and medical scientists of the world, united through our loyalty to the Hippocratic Oath, recognize that our profession has been captured and corrupted at every level.*

The mainstream media and the Governments of most nations have ignored these pleas from eminent Doctors and Scientists.

## **EXCESS DEATHS IN THE UNITED KINGDOM**

Excess Non Covid deaths in the UK since April 23rd this year have exceeded 10,000. The National Statistician, Professor Sir Ian Diamond recently wrote to the House of Commons and in that letter he referred to –“*the higher than expected rate of deaths of 12.2 % above the five year average*”.

## **EXCESS DEATHS IN THE UNITED STATES AND EUROPE**

Death numbers from All Causes in the United States are also excessive this year and, worryingly, this is actually the third year of such excess.

At present, the excess deaths are tracking along the same trendline as last year, 2021. The US reported 3,457,397 deaths from all ages for the year 2021. Expected deaths were 2,971,452. Thus, that was an increase of 485,945 deaths (+16.4%) above the expected number.

In Europe, Excess Death numbers from All Causes are tracking along the same trajectory as last year, 2021 when there were 339,721 deaths above the expected 5 year average. If that trend continues, then we may see over 400,000 excess deaths in Europe this year, according to the data and charts provided by Euromomo. The covered

population mortality in the Euromomo network of 29 nations is approximately 420 million people, as of 1 January 2021.

It looks very much like we may be on track to see approximately 2 Million excess deaths above expected numbers over the course of 2021 and 2022 in the USA and Europe with a combined population of 750 Million people.

Surely 2 Million Excess Deaths warrants a formal enquiry as to the cause?

The New York Times has estimated that 5.3 Billion people worldwide have received a dose of these Covid injections. Extrapolated globally, this Phase 3 Clinical Trial of an experimental genetic therapy technology may already be responsible for approximately 14 Million excess deaths above expected averages.

Staggering. And, indeed, historic.

This cannot be due to Omicron Covid as its mortality rate is far, far lower than the Alpha and Delta variants. And all the Mutations being registered now for 7 months are 100 % Omicron (!!). Delta and Alpha have effectively disappeared.

**All Viral Mutations Registered here –** [Nextstrain / ncov / gisaid / global / 6m](#)

Scroll down to Frequencies (colored by Clade) -- Mutations registered by Clade/Variants -- you will see that 100% of the Viral Mutations now being registered are for Omicron (No Delta and No Alpha)

## **EXCESS DEATHS IN NEW ZEALAND**

A recent study conducted in New Zealand found a close relationship between booster rollout and rising excess mortality. The study was published in EconPapers, the world's largest collection of online Economics working papers, journal articles and software.

### **The Rollout of COVID-19 Booster Vaccines is Associated With Rising Excess Mortality in New Zealand**

Reference: [https://econpapers.repec.org/paper/waieconwp/22\\_2f11.htm](https://econpapers.repec.org/paper/waieconwp/22_2f11.htm)

The researchers deduced that age groups most likely to have had booster injections had up to 10 percent more excess mortality than the age groups most likely not to have taken up a booster dose. The paper was authored by John Gibson, a professor at the University of Waikato's Department of Economics.

## WHO IS DYING – WHAT AGE GROUP IS AFFECTED?

We need to start looking at the economic and social impact of excess death, especially as the age group most affected appears to be the 20 – 60 year age group according to reports from various large US life insurance companies.

## ABNORMAL PREGNANCIES

### INCREASED MISCARRIAGE RATES IN HIGH RISK PREGNANCIES

In the last month, two eminent Obstetricians in the US and Australia have also added their voices to the matter. The Australian Obstetrician has stated that his miscarriage rate in Covid vaccinated high risk pregnant women is now 74% compared to the normal miscarriage rate of 13 – 16 % for high risk pregnancies in invaccinated women.

The other US based Obstetrician now describes the vaccines as “poisons” in public videos warning women against their use. He has seen ***“many, many, many complications in pregnant women, in moms and in fetuses, in children, offspring...fetal death, miscarriage, death of the fetus inside the mom.”***

***“What I’ve seen in the last two years is unprecedented,”***

Reference: <https://totalityofevidence.com/dr-james-thorp/>

There is also very concerning data now coming in on reductions in Live Births, increased Stillborn numbers, increased Miscarriages, increased IUFD's and foetal abnormalities.

## DR JAMES THORP – OBSTETRICIAN

Dr James Thorp website -- <https://totalityofevidence.com/dr-james-thorp/>

In his practice he sees 6,000–7,000 high-risk pregnant patients a year and since the COVID-19 vaccines have rolled out he has witnessed many more cases of fetal deaths and miscarriages inside mothers. Attempts to quantify these adverse effects are hampered by the imposition of September 2021 gag orders on physicians and nurses.

*“I’ve seen many, many, many complications in pregnant women, in moms and in fetuses, in children, offspring...fetal death, miscarriage, death of the fetus inside the mom.”*

*“What I’ve seen in the last two years is unprecedented,”*

## CARNAGE IN EMERGENCY - A NURSES TESTIMONIAL

<https://rumble.com/v18lw20-vaccine-carnage-in-the-er-a-nurse-speaks-out.html>

## A PUBLIC HEALTH CRISIS

From Prof Marty Makary -- Professor of Medicine and Public Health at Johns Hopkins Univ

*"The official public health response to Covid **has undermined the public's belief in public health itself**. This is a terrible outcome with potentially disastrous consequences. For one thing, because of these sloppy and politicized policies, we run the risk of parents rejecting routine vaccines for their children—ones we know are safe, effective and life-saving."*

## IS THIS THE BIGGEST CRIME EVER COMMITTED ON HUMANITY?

Christine Anderson, a German Member of the European Parliament recently described the whole Covid response thus — ***"this vaccine campaign will go down as the biggest scandal in medical history and, moreover, it will be known as the biggest crime ever committed on humanity"***.

If so, we must all ask ourselves — Who is responsible and where are they?
